Student Innovations

Company Name: Dexplovate Private Limited
Founder: Suchandrahas Medamalli
Dexplovate develops an AI-powered medical device that assesses pulmonary disease severity by monitoring vitals and detecting airflow in the lungs, enabling real-time, effort-independent health assessments for improved diagnosis and treatment.

In December 2023, Suchandrahas and V. Narasimha Raju received a ₹10 lakh grant from DST, India, for their asthma management innovation, AIR (Asthma in Rescue). They later won an award of honor at Entrepreneurship Day, GITAM, Vizag (August 2024), and presented their prototype at Global Bio India in September 2024.

Abroad Studies

Hard work, perseverance, and the right opportunities open doors to the future.
Two of our Computer Science Engineering students, Syed Musaib and Venkata Ganga Manoj Raju Pericherla have secured a prestigious employment-linked Master's program at Reutlingen University, Germany.

Their journey through a rigorous selection process, competing at an international level, is a testament to their talent and resilience. At GITAM, we take pride in nurturing students who are ready to take on global challenges. Congratulations to Syed and Manoj! Your journey inspires us all.

"Ram, Laxman & LSE!"

Exciting news! GITAM Deemed University students Ram Ridhan and Laxman Sudhan, twin brothers who studied B.Tech (CSE-DS), have secured admission to The London School of Economics and Political Science (LSE) for an MSc in Data Science..

Their success is attributed to the guidance of faculty members Dr. Lakshmeeswari Gurrala, Venkateswararao Srinivas Prasad, and Dr. Thamada Srinivasarao, who assisted them in program selection building a strong academic profile. Participation in GCGC Career Fairs, seminars, and webinars also played a crucial role in their journey.
