

Article Publication: A Myth

Scientific articles become the basis of research, because the outcome of any research will be displayed to the world by the publication medium. However, people from academics and research always find problems in publishing their research work in scientific journals. To address the problems associated with the article publication a technical talk is arranged. The technical talk is focused on the following points:

1. How an article should be - a publisher perspective?
2. What are the key areas to be focused while drafting an article? A Reverse Engineering Process.
3. How to identify the right journal and the key differences in multiple indexing services available?
4. How important is domain specialist review, before submitting to review? Unknown areas
5. Impact of chatgpt and other tools in drafting an article?
6. Plagiarism and Publication Ethics.
7. Few Tips for drawing the attention of the publishers.
